MESSAGE FROM THE PRESIDENT

EuCornea

Temple House

Temple Road

Blackrock

Co. Dublin

Ireland

Dear Colleagues

On behalf of the Board and Officers of EuCornea, it is my great pleasure to welcome you to Lisbon for the 8th EuCornea Congress.

Over the course of the next two days delegates will enjoy a choice of excellent sessions. The latest developments in Cornea and Ocular Surface Disease will be presented by leaders in the field, in the eight Focus Sessions, seven Instructional Courses and four Free Paper Sessions.

The EuCornea Medal lecture will be given during the Opening Ceremony on Friday at 5.30pm. This year this esteemed lecture will be presented by Past President of EuCornea Prof. Francois Malecaze on the topic of “Keratoconus: What We Have Accomplished and What is Still Left to Do”.

EuCornea is delighted to be once again partnering its annual meeting with the XXXV Congress of the ESCRS. As part of this collaboration, a combined EuCornea/ ESCRS Symposia will take place on Saturday on the topic of ‘The Irregular Cornea’.

Finally I would like to thank all organisers and speakers for their invaluable role in creating such a high calibre scientific programme for the 8th Congress.

I wish you a successful and rewarding Congress and hope that you enjoy your stay here in Lisbon.

A handwritten signature in black ink, appearing to read "F. Kruse".

Fredrich Kruse

President, EuCornea

EUCORNEA MEDAL LECTURE

Keratoconus: What We Have Accomplished And What Is Still Left To Do?

François Malecaze *FRANCE*

Prof. François Malecaze is Head of the Ophthalmology Service Unit at Toulouse-Purpan Hospital, France. He undertook medical studies at Toulouse University (1971-1977) and then a residency program, from 1977 to 1983, at the Toulouse-Purpan Hospital. He obtained his PhD thesis in the INSERM research unit in Paris in 1992. He is Head of the Research Ophthalmic group in the “UDEAR” unit (INSERM), Coordinator of the French National Reference Center for Keratoconus (CRNK) and President of the French Society of Refractive Surgery (SAFIR).

Prof. Malecaze is internationally recognized as a key opinion leader in the field of corneal and refractive surgery, corneal diseases (keratoconus), molecular biology and genetics of cornea and myopia. His contributions to these fields have resulted in numerous prizes and awards such as the National Prize of the Jean Daloze Foundation and research funding from the ESCRS.

Prof. Malecaze is past-president of EuCornea and member of various international scientific societies, such as the ESCRS, the Association for Research in Vision and Ophthalmology (ARVO), and the American Academy of Ophthalmology (AAO). He has submitted a number of patent requests, is regularly invited to speak in international meetings, is author of more than 220 international publications and has contributed to 20 book chapters on topics related to the cornea and refractive surgery.

Instructional Course 2

Two Common Corneal Procedures: Corneal Gluing and Corneal Sampling

Moderator: H. Dua UK

Presenters: D.G. Said UK
R. Jayaswal UK

Corneal Gluing

Cyanoacrylate glue: Properties, indications, technique (direct, with disc support, double drape technique), follow up of patients and sequelae

Fibrin glue: Theory and properties, indications in ocular surface surgery and pathology, technique, fate of glue. Unconventional applications

Corneal sampling

Scrapes and swabs: From conjunctiva and cornea for microbial detection. Techniques of plating, smears on slides, storage and transport - Variations for viral, bacterial, fungal and parasitic infections

Alcohol delamination: Diagnostic and therapeutic indications, techniques and sample handling and preparation

Cornea biopsy: When, where, how and how many - processing for light and electron microscopy, culture and polymerase chain reaction testing

Conjunctival biopsy for mucus membrane pemphigoid/OCP; tumours: Technique, closure of defect created, sample preparation and handling

ECCTR Instructional Course

Course Level: All Levels

Using the European Cornea and Cell Transplant Registry for clinical improvement

Leader: **M. Lundstrom SWEDEN**

Faculty: **M. Dickman THE NETHERLANDS**

Course outline

This course will inform about the importance of quality improvement work. The ECCTR system will be presented as a tool to improve quality in corneal transplant surgery. Legal aspects of an international registry including ownership of data and ethical aspects will be discussed. Detailed instructions of how to enter data into the system and take out reports will be given.

Course objectives

Inform about quality improvement work. Provide knowledge about the ECCTR system. Inform about legal aspects of an international disease registry. Provide knowledge about how to enter data into the system. Provide knowledge about how to take out data from the system.

Course schedule

- 16.45 The concept of quality improvement in healthcare
- 16.55 Quality Registry – ECCTR
- 17.15 Legal aspects
- 17.20 Reporting data – input of data
- 17.35 Take out reports – output of data
- 17.45 End of session

BIOMECHANICS MEETS TOMOGRAPHY

HEY CORVIS ST
I just took a look at the tomography.
These values call for caution.
I don't think I would operate.

HI PENTACAM
The biomechanics looks good, though.
The cornea is very stable.
I don't see any problem with operating.

O.K. TOGETHER NOW
Tomography and corneal biomechanics
together make the decision easier:
Surgery could be an option.

Corvis® ST meets Pentacam®:
Combined measurement results
for a safe decision on surgery.

Benefit from the combination of biomechanical data from the Corvis® ST
and tomographic data from the Pentacam®.
Provide surgical care to more patients safely!

OCULUS at the **ESCRS** in Lisbon, booth **P210**.

TIP: Join us at the Lunch Symposium on the clinical
applications of Corvis® ST and Pentacam® AXL.

OCULAR BURNS TREATMENT: FROM ACUTE PHASE TO RECONSTRUCTION

Our focus is clear.

We believe that there's a better future for the people we help; those living with and affected by ophthalmic diseases. And for us that means having the courage to do things differently.
